Subject: Telephone Inquiry - Spectrum Quarry Area

I received a phone call 3/14/99 from Bill Pappas (Cambrillic Natural Stone - S/027/079). Mr. Pappas inquired if we had any record in our database of a mining permit for Section 23, Township 17 South, Range 13 West, Millard County, Utah. In checking our database, the only record we have for this location is the old Spectrum Quarry. We previously had two notices for the Spectrum Quarry; one with Sapphire Corporation (later taken over by Barron Trading Company who took out bankruptcy), and the other with Capital Markets Group, LLC (whose permit was withdrawn at their request). Both of these files have been closed and retired. The Division has no other record on file for Section 23.

Mr. Pappas informed us that someone is digging in Section 23 - he has witnessed scales, trucks, and about 50 pallets. He said these are his claims and was wondering who was digging there. He has now contacted the sheriff's office to file a complaint for someone on his claims. Mr. Pappas is taking pictures of the evidence he has found there.

A copy of this will be sent to Mr. Pappas's file (S/027/079).
